Maslan – The Negev Sexual Assault and Domestic Violence Support Center, one of nine active crisis centers working in Israel, is responsible for the entire Negev region from Kiryat Gat to Eilat. Maslan has been active since 1988 in providing assistance, practical aid and emotional support for victims of sexual and domestic violence and their families. Alongside this, through educational activity and publicity, the organization works to tackle the root of the problem and create social change: break the silence, raise awareness and therefore reduce the levels of such violence within our society.
